

Juan Pablo Aragón Salinas

Multimedia Engineer | Bogota, Colombia

+57 3214648366 | juan.aragon.ps@gmail.com | [LinkedIn](#) | [Portfolio](#)

Multimedia Engineer with experience in developing interactive digital content, 3D art integration, and programming for multimedia environments. Specialized in gamification and the production of optimized 3D assets for real-time engines. Advanced proficiency in software such as Blender, Maya, ZBrush, and Substance Painter, complemented by programming skills in C# and C++. I excel at integrating creativity, technical problem-solving, and a strategic approach into digital projects for video games.

EDUCATION

Junior Unity Developer | *Generation Colombia, Bogotá, Colombia* 01/2026 - 05/2026

3D Environment Art Design | *Into Games, United Kingdom* 05/2024 - 07/2024

Multimedia Engineering | *Universidad Militar Nueva Granada, Bogotá, Colombia* 06/2012 - 09/2018

WORK EXPERIENCE

E-learning Course Developer | *Menugrafía, Bogotá, Colombia* 08/2020 - 03/2023

- Led the design and prototyping of a gamification strategy to optimize the induction process for Findeter.
- Implemented game mechanics aimed at increasing the engagement of new employees, transforming initial training into an interactive and efficient experience for the organization.

Multimedia Engineer | *GP Strategies, Bogotá, Colombia* 01/2019 - 07/2020

- Developed more than 5 interactive e-learning projects for Universidad Ecopetrol through the synergy of programming and visual design.
- Delivered solutions that impacted the professional training of various cross-functional areas, ensuring scalability and proper assimilation of technical content in a corporate environment.

PROJECTS

Handpainted Diorama | *Into Games, Reino Unido* | *2D/3D Artist* 03/2024 - 07/2024

- Developed the 3D project 'Khepri's Fountain', prioritizing technical efficiency without compromising aesthetic quality.
- Optimized the model through rigorous retopology and rational use of texture maps.
- Completed integration in Unreal Engine 5, leveraging the engine's post-processing tools to polish lighting and visual effects, demonstrating mastery in the environment creation pipeline for video games.
